# VOICE AND AUDIO TECHNOLOGIES FOR THE AUTOMOTIVE WORLD

Are you looking for features that have an underlying improvement in road safety, convenience and entertainment?

Alango, a leading voice and audio DSP processing software provider, presents the most extensive portfolio of front-end speech and audio processing technologies in the market.

## WE WILL DEMONSTRATE THE FOLLOWING TECHNOLOGIES:

**Voice Enhancement Package**
offers multimicrophone beamforming array and echo cancellation technologies to enhance speech recognition performance for voice-controlled automotive applications.

**Sound Reinforcement Package**
enables intelligible, naturally and easy in-car voice communication between the driver and the rear passengers.
Communicate naturally and safely while keeping your eyes on the road.
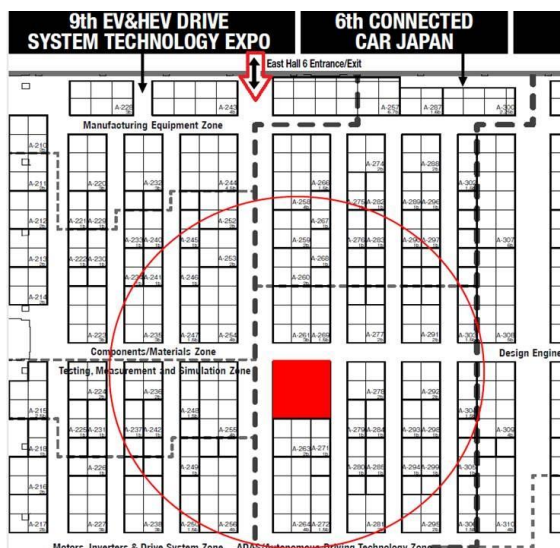

**Music Refiner (MuRefiner™)**
has been designed to enhance user's listening experience on the road through the optimization of stereo, spectral and bass enhancement according to driving conditions.

## COME AND MEET US
## IN THE ISRAELI PAVILION:

IN 2017 ALANGO DSP SOFTWARE WAS INTEGRATED IN MORE THAN 8 MILLION AUTOMOTIVE PRODUCTS (OEM AND AFTERMARKET)

*Please RSVP so we can schedule a time for you to meet, see, HEAR and discuss*
