

VoiceFirst™

ENHANCED SPEECH
IN TV SHOWS AND MOVIES

Annoyed by excessive background sounds while watching movies? Sporting events? TV shows?

It can be a problem for everyone, but older adults and individuals with hearing loss can really suffer from it.

VoiceFirst™ technology is here to help.

VoiceFirst™ is designed to mitigate detrimental background effects, thereby enhancing speech intelligibility and thus improving the overall viewing experience.

Integrate VoiceFirst™ technology into your product and let users enjoy listening again, as before, as it should be: the proper mix of music, sound effects, and spoken dialogue.

Available on a variety of DSP/MCU cores.
